Definition; '*people training at one time*'- amount of people in a training session at one given time. For example, 1- if a trainer is having 3 groups of 6 people throughout the day, there would only be 6 people training at one time, therefore they would book 'Whole day £330'. 2- If you are running a camp with two trainers teaching groups of 6 at any given time, there would be 12 people training at a time, therefore you would book 'Whole day £360'.
